

1. Measure curved wall area to determine radiator size needed.

2. Lay lining paper/wall paper over A & B. Gently fold the paper into the shape of the bay where A meets B, by using pen following the line below

3. Carefully cut along your folded line or against the pen line with a pair of scissors. Fold up your template A (not B) carefully and put in in a large envelope along with your contact details, type of radiator and send to the below address.

Angell Welding,
273 King Henry's Drive,
New Addington,
